

ISO 14001 Environmental Management System

GREAT LAKES WORKS

Environmental Policy

Compliance

Led by

Environmental

Awareness and

Responsibility

The Environmental policy of United States Steel Corporation, Great Lakes Works (GLW), is to operate in a manner that is protective of human health and the environment and to include environmental management as a factor in business decisions.

The GLW organization is committed to:

- Fully complying with all applicable federal, state and local environmental laws and regulations and other requirements to which GLW subscribes including the prevention of pollution.
- Promoting awareness of GLW's environmental policy and training all persons working for or on behalf of GLW to conduct operations and maintenance activities in an environmentally responsible manner.
- Identifying and implementing opportunities to reduce or eliminate pollution
- Setting, regularly reviewing and updating Environmental objectives.
- Continually improve GLW's Environmental Management System through regular reviews to enhance environmental performance
