Environmental Manual-PL.B

Clairton Works Environmental Policy

Revision: 3

Page 1 of 2

U.S. Steel Clairton Works is committed to the prevention of pollution by seeking to achieve minimal adverse impact on the air, water and land through programs which incorporate responsible environmental management.

Environmental protection is a primary responsibility of every employee.

Continuous Improvement To Environment

Continuous compliance with all applicable environmental laws and regulations and any other applicable requirements. All environmental noncompliances will be investigated, assigned root causes, documented, implemented and verified for effectiveness. Preventive measures are reviewed for relevance, implemented and evaluated for effectiveness. Clairton Works' personnel participate, where appropriate, in the development of public policy and governmental and inter-governmental programs.

Improvement, continually, of our environmental performance, including objectives and targets, through annual reviews with Clairton Works' top management. Environmental performance will be regularly measured and assessed for conformance to EnvMS guidelines and compliance to legal requirements. Appropriate information regarding environmental performance is periodically provided to top management and employees and made available to the public.

To train and educate employees to conduct their activities in an environmentally sound manner. No one has the authority to cause or allow an environmental noncompliance for the sake of production.

Environmental impact evaluation of proposed actions, including process and practice changes, which may have an environmental impact.
