

Scott M. Dorn

Senior Vice President, Tubular Solutions

Scott assumed responsibility for all aspects of the Tubular business in February 2021 as Vice President and advanced to his current role in June 2025.

Scott joined U. S. Steel in 1988 and advanced through increasingly responsible positions in engineering, plant operations, financial analysis and accounting, corporate finance, strategic planning, and business development. In 2005, he was appointed director-commercial for Tubular products and in 2007 advanced to general manager of Tubular marketing.

Mr. Dorn holds a bachelor's degree in electrical engineering from Kettering University, formerly the General Motors Engineering and Management Institute and a master's degree in industrial administration from Carnegie Mellon University.
