COASTALUME™ carries a best-in-class coastal warranty, with 25-years on the substrate and up to 50 years on the finish, 300' from breaking surf or 0' from intercoastal waterways and brackish water sources.

Digital color rendering may vary slightly from actual film color. Samples of any color are available upon request at www.dupont.com/tedlar/contact-tedlar.html

COASTALUME™ is North America's first GALVALUME® solution engineered and warranted for coastal environments.

COASTALUME™

The new COASTALUME™ product combines U. S. Steel's GALVALUME® solution with DuPont™ Tedlar® PVF film to create a revolutionary, maintenance-free, and highly sustainable roofing and siding solution that offers a level of durability needed in residential and commercial construction along the coast.

The COASTALUME™ system is built to last, limiting replacement throughout the life of a building. COASTALUME™ standing seam roofing and wall systems provide strength and protection from extreme weather:

Can withstand hurricane-force winds up to 140 mph

Fire retardant

Reduces potential for leaks and related water damage

Resistant to chalk, fade, mold, mildew, salt spray, chemical corrosion, and graffiti
