

October 30, 2025

U. S. Steel is proud to partner with communities across the country — including right here in Minnesota. We believe our business thrives when we are actively engaged and involved in the communities where we operate.

Across our state, we are committed to positively impacting the communities that we call home, to enhancing and improving quality of life in those communities, and to supporting projects and opportunities that advance safety, education and environmental stewardship.

SAFETY FIRST

U. S. Steel's Minntac was honored to welcome Minnesota State Representative Anquam Mahamoud as part of the Minnesota Legislative Exchange program. Hosted by fellow State Rep. and current Minntac employee Cal Warwas, the visit gave Rep. Mahamoud her first look at mining operations in northern Minnesota and an opportunity to connect with our employees.

This bipartisan exchange program is a first-of-its-kind in the U.S. and aims to help bridge divides and foster trust by pairing legislators from different communities and perspectives.

Thank you, Rep. Mahamoud, for visiting Minntac, spending time with our employees, and learning what mining means to the fabric of the communities on the Iron Range.

PROUD PARTNER

For the first time ever, the Pan Continental Curling Championships are being held on U.S. ice!

U. S. Steel and our Minnesota Ore Operations team are proud to sponsor this historic event, celebrating the shared drive and determination that power athletes, miners, and steelmakers.

From our mines on Minnesota's historic Iron Range and our steel mills across the U.S. to the ice-cold curling rink, it's all about precision, teamwork, and delivering results.

GOOD NEIGHBOR

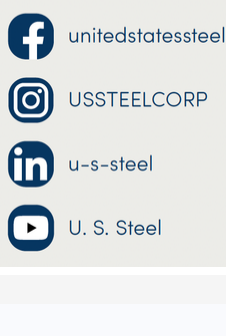

The team at our Minnesota Ore Operations proudly participated in the recent STEM Showcase in Hibbing, Minnesota, where they connected with more than 200 enthusiastic 6th graders from communities such as Nashwauk, Rock Ridge - NorthStar, Blackduck, and Chisholm near our facilities to show the opportunities available in the fields of science, technology, engineering, and math.

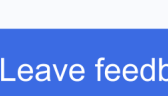

Our booth, led by Bethany Jones, featured the ever-popular Plinko game, complete with science-themed questions and some hilarious answers that kept students laughing and learning. It was inspiring to see our team in action, sparking curiosity and excitement about STEM careers.

Big thanks to our volunteers and everyone who helped make the booth a hit.

We're proud to support the next generation of innovators!
